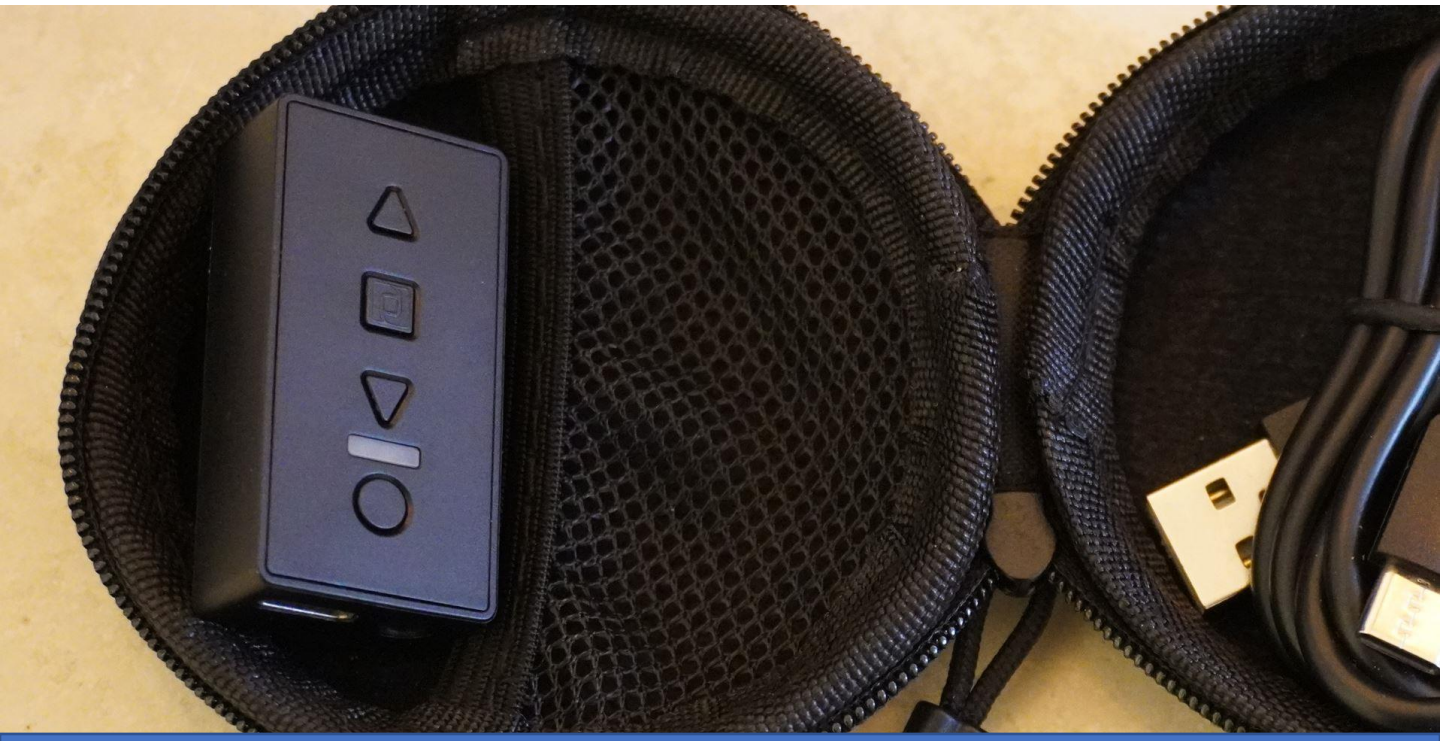
Dual-Source Bluetooth Amplifier

periodic audio®

Mobile-First Hi-Fi



Neon bestows wireless superpowers upon ANY wired headphone

Seamless Source Switching

No more hassles un-pairing and re-pairing your most used sources. Connect to two different devices and hop between them with the press of a button.

You Shall Pass! - Gandalf

Neon's battery is certified by the Council of the Wise for Lord of the Rings – Extended Edition – including side quests for porcelain respites and food preparation... about 15 hours.

Architected for Sound Quality

Most mobile devices use the mediocre amps integrated into multi-function chips. Neon's discrete amplifier stage architecture delivers best-in-class sound quality.

Tailored Convenience

Neon automatically provides the best software decoding possible for your application. Whether you require Low-Latency performance for movies and gaming, or sound quality focused for music.

Robust Analog Microphone

Pro-grade dynamic microphone for the Highest quality capture. Neon's analog microphone yields a natural, full-bodied sound for whoever is listening.

Power Output: 60mW RMS total @ 32 Ohms

Frequency Response: 20Hz – 20kHz

Codecs Supported: SBC, AAC & aptX-LL, and aptX.

Battery Life: 15 hours, typical (1 hour charge)
