VR/Console/CRT

2 Server
One for streaming
One for caching steam library
Gigabit switch

Peripheral

Corsair K95 Platinum Keyboard
Corsair Sabre Gaming Mouse
Corsair ST100 RGB Premium Headset Stand
Corsair VOID PRO RGB Wireless Premium Gaming Headset
ASUS PG279Q
Logitech C922 Webcam for streaming

Why use corsair?

ICUE lightsync. For group streaming use.

Why desk setup like this?

So you can setup a top to bottom cam to stream which player dead in the game and the light turn red or fade black.

Why 2 row of player?

So you can have competitive game for channel super fun.

If can vr/console/crt area?

Paint all green on the floor to the wall so can show spectator what VR player are playing at or using projector project on it. Then no need green screen.
